Developer

Summary

Hello, I am a Web developer, and I like to develop for different media and interactivity experiences. Recently i have been working for a big company running a lot of AB testing, in an agile environment, i also have experience developing a lot of API's and create Web apps using micro-services, but I also enjoy digital fabrication, especially 3D printing, and I have some small projects for the IOT. using physical computing.

Work experience

Jan 2017 - current	<p>Front end Developer</p> <p>https://www.edreams.es/</p> <p>Working in a big application in 43 markets, around 20 millions customers year, using agile methodologies, and every new functionality in AB testing, my product is specialized in mobile web, Automation testing</p>
